13 April 1956

MEMORANDUM FOR: ELINT Staff Officer

SUBJECT : System #3 Recommendations

1. It is recommended that [] notify the supplier that all vehicles beginning with No. 9 should be equipped with a System #3 antenna.

2. The supplier has been asked to examine the possibility of building a version of System #3 with three fixed frequencies, these three frequencies to be controlled by a field maintenance setting.

3. Six System #3's are on order (with three for spares). The production schedule is two Systems by 1 June 1956, two by 15 July 1956 and two more by 1 September 1956. The supplier has promised to try to speed up the first delivery so that it might be available for vehicle 9's first operation.
